

Data Diary

1. Downloaded the data set from the census - S2201, which tracks participation in SNAP
2. By county, I divided households on ebt/snap in last year by number of households
3. This got me the percentage of households that were enrolled in SNAP, it's 5-year compiled data
4. For the Trump voter data, I pulled data from the AP graphic showing voter turnout throughout PA, and I manually entered this into excel, by county
5. Imported both data sets in datawrapper for my maps
